

Postdoctoral Positions in Synthetic Biology Biodesign Lab at Rice University

Applications are invited for several open postdoctoral positions in the Biodesign Lab at Rice University. A PhD in biochemistry, bioengineering, physics or related field and experience in experimental and/or theoretical synthetic biology are required for work on projects involving: 1) the design and characterization of engineered control systems in probiotic bacteria; or 2) engineering cellular differentiation pathways in synthetic multicellular systems.

Applicants should send a CV (including publication list), a brief research statement (2 pages max), and the names of 3 references to:

Matthew Bennett, PhD
Associate Professor
Depts. of Biosciences and Bioengineering
Rice University
